ABOUT

iNFO Dynamics Consulting was founded on September 2002 envisioned to be a major player in business consultancy in the north of the Philippines whose primary objective is to help organizations advance their technical business requirements in information technology (IT), business and financial analyses. Our consultants have in them years of experience in analysis, design, development, deployment and training of various business processes, which enhance operations and adapt to the increasing complexities of managing the business. Our focus has been in the business intelligence market, which has shown tremendous growth especially in information technology. Because it has been proven that corporate data solutions improve decision-making, reduce ownership cost and increase business profitability, we have put emphasis on this area to our clients.

ReX®
Receipt eXpress System

Designed specifically for pharmacy, convenience stores, hypermarts and retailers of cosmetics and beauty products. It uses hybrid forwarding matrix to display sales queries and invoicing stock information on-screen. Includes all the power of (ReX) Receipt eXpress System™ with added features like medical information and box quantities. Automated replenishment features, easy item expiry notification report, dynamic or minimum/ maximum choice, seasonal sensitivity sales, master file import, monitor transfers, real-time inventory management ability, and even your fine dining restaurants.
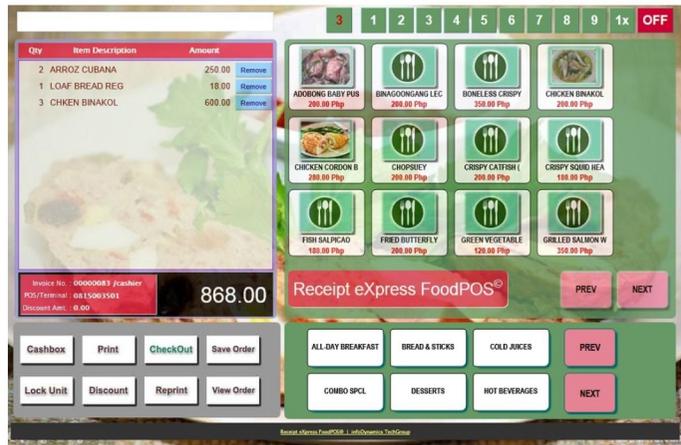

Most importantly, the system takes the frustration out of technology, so you can focus on what you do best – helping customers and growing your business. It help you accomplish more to keep you consistent, make inventory level low, and profitability higher. Conversion is rapid and reliable, with 100% functionality from day one of production. And our technical support is among the best in the business.

▶ BASIC FEATURES

- Easy-to-learn front panel invoicing instruction.
- Records daily sales transactions with function for discounts, void transactions, item returns and on-line product queries.
- Supports multi-split invoicing transactions
  a. Cash payments
  b. Credit card purchases
  c. Loyalty cards, on-credit and company affiliations (special promotions)
- Supports volume, outright and senior citizens' provisional discounting.
- Supports cashlift and automatic cashbox management procedures that handles your cashiers' cash count.
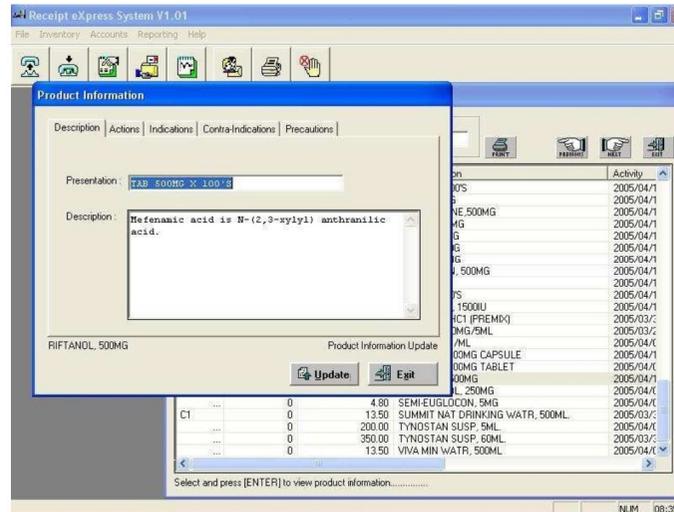

- Hybrid multi-user configuration wherein you can set workstations as a query or invoicing station.
- Records store inventory purchases and monitors stock on-hand as part of Inventory Management Module function.
- Monitors three-level item pricing which can be easily transmitted and updated while transaction is on-line .
- Provides handling of bin locators for easy medicine or item procedural tracking.
- Provides quick data entry via barcode scanner or the usual Windows PC keyboard.

- Generate reports which can be directed to the local printer or an option to save as a file.
- Provides On-Line Help facility which can be printed or viewed on screen.
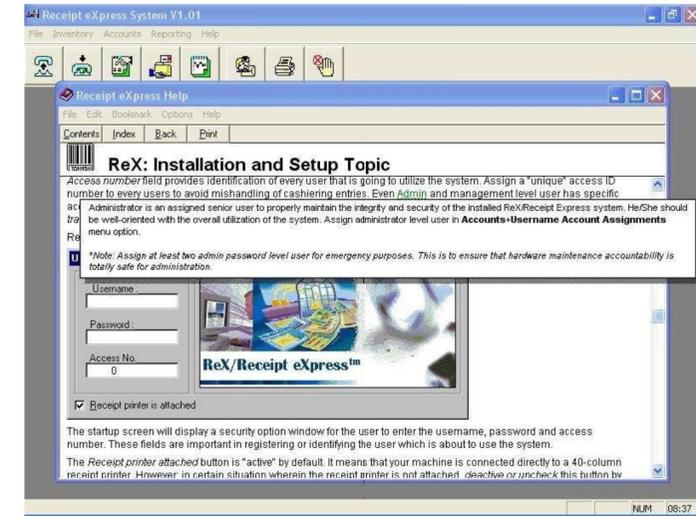

▶ REPORTS GENERATED

- Product sales reporting; summarized report of sales transactions classified into item type or any selected item opted by the user.
- Sales entry report; reproduction of transaction receipts or at the option of the user, a summary of all transactions classified into different payment modes.
- Sales ranking report; ranking sales transaction according to amount or quantity sold for the day (or selected inclusive dates)
- Sales registry by hour.
- Automatic expiry notification report.
- Purchase order listing in-a-box.

▶ SPECIAL FEATURES

- Automatic "recall" on invoiced transactions on abnormal shutdowns.
- Built-in user security allows access to functions based on user-levels for control.
- POS 'front-end' interface supports ads placement.
